

Cartesio/ Frattale

Design by Estel R&D

Cartesio is a storage system with depths of 50 (19 $\frac{5}{8}$ ") or 85 cm (33 $\frac{1}{2}$ "), arranged along Cartesian axes, which support P016 worktops. Cartesio allows wide possibilities to create L-shaped or U-shaped compositions of storage units and desks. Frattale system increases the compositional possibilities of Cartesio system, thanks to triangular joints of various dimensions that allow to create infinite layout possibilities (linear, circular or sinuous). The different storage units are integrated with CPU, hinged or sliding doors, open compartments, top access, technical compartments to house cables and electrical sockets. Key feature of Cartesio and Frattale is the wiring integrated in the storage units: a special compartment placed along the longitudinal axis allows a continuous wiring; thanks to removable front panels the compartment is always accessible, also in the case of sequences of several following elements. To foster the privacy of employees containers can be equipped with soundproof screen panels covered in technical fabric.

TECHINCAL FEATURES
