

NOVELTIES @ WORKSPACE
EXPO – PARIS 2019

The brand new modular freestanding box designed for open space work environments features aluminum structure, glass walls and internal soundproof upholstered panels. Collaborative Room is available in 13 different sizes – from 2.5 to 14 sqm – and can accommodate up to 12 people. Each solution can be furnished in many ways, based on functions and layout needs. The sound absorption is guaranteed up to 36dB and the electrification system is integrated with dimmable LED light – activated by a presence sensors. A VMC ventilation system permit to control temperature, humidity and CO2 levels inside the box thanks to an App.

The Dolly range consists of sofas, armchairs and modular benches designed to furnish the common areas. The Privè version with 2/4 seats - equipped with electrified table and lighting - is ideal for mini meetings. The particular morphology of the back of these products and the use of sound-absorbing materials guarantee an excellent level of acoustic privacy and allow to place the products even in open space work spaces. In the Chat version two sofas are structurally linked by a technical panel, also available in a two-color version.

In modern working environments even moments of pause become a fundamental element ... Estel, thanks to its historical background in Home and Office furniture, interprets this important area of the workplace with the “Coffice” array. Isola Lounge, a product to be placed on the wall composed of columns H150 cm with double cabinet and open compartment for coffee machine in addition to the central technical compartment designed to accommodate a video monitor. This solution is also equipped with two leaf columns with hanging compartment. The system is designed for an easy access to electrification and network connections via a functional top access.

Embrasse is a family of chairs signed by Jorge Pensi, in which you can find both typical office type executive chairs and chairs for waiting areas and lounges.

The bench and sofa structure is composed by a frame in multi-layered wood with elastic spring bands. The padding is made of different foam layers to provide greater comfort. Outstanding attention to the stitching details that enhance the quality of the proposal and identify the manual skills typical of our company.

P45 is a new product line developed by Estel featuring elegant wooden legs in oak veneer. This array allows the creation of single desks or benches with square, rectangular, circular or elliptical shape characterized by rounded edges (Ergo worktop). Thanks to its ergonomic shapes, P45 offers the maximum freedom in space planning together with a wide range of finishes. All benches have integrated electrical connection in the undertop metallic tray and can be supplied with top access, accessories bars, monitor arms, CPU holder, screen panels, whiteboards, cable holders, cable trays, thermoformed cable and plugs tray with modesty panel function.

The “Evolution” range features various solution of integration between height-adjustable desks and side storage units (always with an height of 50 cm), worktops with a thickness of 30 mm and lifting system ranging from 60 to 125 cm from floor level thanks to the innovative electronic lifting system. Worktops are available with melamine finish or in the elegant Ergo version, in MDF w/ melamine finish and visible core covered by transparent protective coating.

Evolution 33 version

Storage units (depth 33 cm) feature different set-up: drawers and filing cabinet; two drawers; door cabinet with Ecobox and Chair Box Vallet. Single desk or benches are also available.

With the new 3-6-9 Partitions System, Estel has created a unique solution for Aesthetics, Functionality and Sound Insulation. The use of glazed partitions is appreciated for its transparency, whereas privacy is granted by the use of wooden panels both for Executive areas and Workstations; 3-6-9 Partitions are suitable for Meeting Rooms and Training Rooms as well. A useful and easy-to-handle System, for Space Planners, Facility Managers and Architects.

The "3" single-glass wall (W 32 mm – 1 1/4") meets soundproofing requirements of up to 36 decibels at the lowest possible cost, maintaining the same level of functionality
